Getting Started

You will be asked questions about work-related **knowledges**, which are sets of facts and principles needed to address problems and issues that are part of your job.

INSTRUCTIONS

- Read the definition of the knowledge provided in the dark blue box above the question.
- Then, rate how important the knowledge is to the performance of your current job.

EXAMPLE

Mathematics knowledge refers to arithmetic, algebra, geometry, calculus, statistics, and their applications.

How important is **mathematics** knowledge to the performance of your current job?

- Not important → **Go to next question**
- Somewhat important
- Important
- Very important
- Extremely important

If you select at least somewhat important, you will be asked to rate the **level** of the knowledge.

- The **level** of knowledge is the amount of expertise in the knowledge needed to perform your current job.
- To help you understand the different levels, job activities are provided that require either a **low, moderate, or high** level of expertise in the knowledge. These examples are from a variety of jobs. They may or may not be directly related to your current job.
- “1” on the scale means that a low level of expertise in the knowledge is needed to perform your current job.
- “7” on the scale means that a high level of expertise in the knowledge is needed to perform your current job.

If at least somewhat important, what level of expertise in **mathematics** knowledge is needed to perform your current job?

Examples of activities from a variety of jobs:

Low: Add two numbers

Moderate: Analyze data to determine areas with the highest sales

High: Derive a complex mathematical equation

- 1 Low 
- 2
