

File Descriptions for the O*NET™ Interest Profiler Instrument and Associated Documents

March 12, 2008

SUMMARY

The files below are provided to enable users to download and print the O*NET™ Interest Profiler instrument and related materials (e.g., score report, user guide, occupational lists). Two types of files have been produced: 1) PDF files for "Desktop" viewing and printing, and 2) PDF "Print Shop" files that can be used by programs/organizations with access to professional printing equipment. Individual files are grouped and distributed as zipped files. Descriptions of the files are provided below. The legend that follows is provided to help you understand the filenames.

LEGEND

IP	Interest Profiler	spr	Printer spreads
Instr	Instrument	cvr	Document cover
ML	Master List	1c	1-color documents
UG	User's Guide	2c	2-color documents
CL	Combined List	4c	4-color documents
SR	Score Report		
deskp	Document layouts and page ordering optimized for desktop printing.	deskv	Denotes documents optimized for desktop viewing and NOT printing.

DESKTOP

Desktop files were created to enable users to view or print O*NET™ Interest Profiler materials from their desktop computer, using either a laser or inkjet printer. Desktop files can be used to print materials for purposes that do not require "professional print shop" quality. This level of quality may be acceptable in printing many of the Interest Profiler materials. However, it is not sufficient for printing Interest Profiler Instruments for administration (see note below). Users should evaluate the quality of materials printed from desktop files to see if it meets their needs.

Interest Profiler (IP-desk.zip)

```

IP-UG-deskp.pdf
IP-SR-deskp.pdf
CL-deskp.pdf
```

* Note: This document represents the desktop version of the O*NET™ Interest Profiler Instrument, primarily provided for desktop viewing. While it is possible to print this document and obtain a good facsimile of the instrument, it is **NOT** for actual production of the instrument. The appropriate files for this use are provided as 4-color print spreads in the IPInstr.zip file provided below.

PRINT SHOP

The files below are provided to enable commercial, private or public printing services to mass produce professional quality O*NET™ Interest Profiler Instruments and associated materials. Print Shop files are produced as press optimized print spreads, at a high resolution. They are suitable for generating print film and for reproduction using professional printing equipment.

All document covers and the instrument are provided as 4-color print spreads. Texts of the documents are provided in either 1-color or 2-color spreads, as appropriate. (NOTE: Desktop versions of the instrument and associated documents can be viewed to further ensure print accuracy and assembly of print spreads.) Any questions regarding their printing can be addressed to onet@ncmail.net.
